

# Medicare Part C QIC Reconsideration Data for 2022

*Annual Report of Part C QIC Activity on Appeals Received in 2022*

6/1/2023

## ***Notes on CMS Reconsideration Data***

**The enclosed reports reflect data on appeals conducted by Medicare's Part C Independent Review Entity for the period 2022. A brief description of the data follows:**

### **Table 1**

Table 1 displays the distribution of final reconsideration decisions, by the general service classification for the appeal.

Reconsideration cases are included in this table if the case was received at MAXIMUS Federal during 2022. The decisions that are contained in the table reflect MAXIMUS Federal's determination, including reopening decisions if applicable. Please note that updates for later levels of appeals are not reflected in these data (e.g., Administrative Law Judge hearings). At the national level, the impact of subsequent appeals is not great. But the reader should be aware that the appeal process allows for further actions not reflected herein.

*Service* is a global classification of the contested care, based on the dollar value of the most expensive service at issue. A not insignificant portion of cases involve multiple contested services. The classification of a case employed here is based on the plan's account of the major item of contested care.

The six outcomes of appeal presented in the table are *Recons Unfavorable* (uphold of the plan decision), *Recons Favorable* (overturn of the plan decision), *Recons Partly Favorable* (partial overturn of the plan decision), *Recons Dismissed* (dismissal of the appeal), and *Recons Withdrawn* (*withdrawal* of the appeal), and *Recons Remanded* (the appeal was sent back to the previous level for review). Cases may be dismissed because MAXIMUS Federal does not have jurisdiction (e.g., in the instance where the enrollee is not eligible for benefits under a managed care plan) or because the appeal does not meet other requirements. The latter include appeals brought by representatives without a properly executed appointment of representative form, appeals brought by providers not under contract with the managed care organization without a properly executed Waiver of Liability form, or appeals in which there is no beneficiary liability. Withdrawn cases are valid appeals that have not been decided because a party to the appeal has requested that the appeal not go forward.

### **Table 2**

The second table uses the same conventions as Table 1, substituting the CMS region responsible for oversight of the managed care organization for the service classification. Note that responsible region is the CMS regional office responsible for oversight, which may not be the physical region in which the plan resides.

### **Table 3**

Table 3 presents the distribution of reconsideration decisions by service category within CMS region.

### **Table 4**

Table 4 shows the distribution of appeals in 2022 by appeal priority and service category. Expedited appeals are those that must be completed within 72 hours of receipt of a valid request for appeal. Pre-

service Part B drug appeals refer to denials of authorization of Part B drugs that do not meet the requirements of expedited appeals. These Part B drug appeals must be completed within 7 days. The Pre-service Part B Drug appeal priority is new effective January 1, 2022. Standard Service appeals refer to denials of authorization (non-Part B drug) that do not meet requirements of expedited appeals. Standard Claim appeals are those related to denials of payment (i.e., after a service has been provided).

## **Table 5**

Table 5 contains plan specific reconsideration data, sorted by CMS region. Note that the designation of a plan is really a specific contract with CMS. These include Medicare Advantage (MA) plans (coordinated care plans, Medical Savings Account (MSA) plans, and Private Fee-for-Service (PFFS) plans), Cost Contracts, Health Care Prepayment Plans (HCPPs), Demonstration Projects, and PACE plans.

What we commonly think of as a single managed care organization may have multiple contracts at a given time. This is particularly true of the large chain managed care organizations. In some cases such entities will have multiple contracts within a given region, as well as contracts in different regions.

Plans are included in Table 5 if the reconsideration was **received** during 2022, or if the plan had any members enrolled as of July of the year. Enrollment figures are those from the mid-year point (i.e., July). Use of the mid-year figure is an arbitrary convention, employed because many reconsiderations (namely all retrospective denials) lag by months the actual enrollment underlying the dispute.

Some plans with reconsiderations during 2022 may have no enrollment during that calendar period. These reconsiderations reflect prior enrollments in specific contracts, and point to the lag between enrollment and a conflict over care being represented in the reconsideration system. The contract in question may have been terminated or converted to a new contract.

Still other plans do have enrollment during 2022 but have no reconsiderations received during the same time frame. This may also be a reflection of the lag issue, as in the case of new contracts.

Table 5 presents a calculation of the rate of reconsideration per 1,000 members per year. This calculation is based on the sum of reconsiderations received during the year, divided by the mid-year enrollment, multiplied by 1000. The presentation of a rate allows the reader to compare activity across plans even though the plans have widely different enrollment.

The last section of Table 5 gives totals across all plans and regions. Hence the reader can obtain counts of appeals, enrolled beneficiaries, and aggregate data on the rate of appeals nationally and distribution of final decisions.

## **Table 5A**

Table 5A contains information about appeals that are favorable or partly favorable to the appellant. The two categories are combined, and the sum is given, along with the percent of appeals that are overturned and the rate of overturns per 1,000 members. Data are presented by managed care contract within CMS Region.

**Table 6**

The final table contains comparable data to Table 5, but only on expedited appeals received during 2022.
